Re: CryoChem Site RI/FS SOW

Dear Dr. Gray:

EPA has reviewed the Scope of Work dated April 4, 1988 and, by this letter, approves the document as final. I have enclosed a report prepared by EPA's Environmental Photographic Interpretation Center which includes historic aerial photographs of the Cryo Chem site. As EPA property, this report may be utilized by you for the duration of the RI/FS, but should be returned to EPA once the project is completed.

As approved in the Scope of Work Schedule, the Sampling and Analysis Plan (SAP) and Health and Safety Plan are due to EPA by May 18th, 1988. With regard to the QA/QC or Quality Assurance Project Plan portion of the SAP, EPA recommends that the document contain the 16 elements itemized by EPA's "Quality Assurance Project Plan Review" document, which I sent you under a cover letter dated December 23, 1987.

Please provide EPA with five copies each of the above documents; in addition, two copies each should be sent to PA DER and one copy each should be sent to PRC. The names and addresses of the PA DER and PRC contacts were sent to you in my February 25, 1988 letter.

Please call me if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Humane Zia".
